

This Method is applicable to all age levels. The Montessori Method is based on two main principles: a child's natural curiosity to learn and their love of gaining new knowledge and skills. Montessori is based on the child's developmental need for freedom within limits, and a structurally prepared environment which offers a wide variety of exposure to a wide range of materials and experiences. Everything a child sees, listens to and touches contributes to their learning.

In a structured, predictable, disciplined environment the Montessori Method allows children to make choices and follow through on their own learning. Children are able to complete given tasks and meet goals, resulting in a satisfying sense of personal accomplishment. The activities foster their inner security and sense of belonging and order. The goals are always to develop self-confidence and build independence - it's an ideal way to prepare children to take control of their learning as they prepare for their future!

Through Montessori the children experience:

Practical Life
Sensorial Activities
Math
Geography
Language
Expression Activities
